Professional Summary

Mobile and Web Full Stack Developer. Looking to work remote in mobile/web projects using REACT NATIVE(mobile)/React JS(web) or in the Back-end with mainly Java/Node.JS, but im always open to work in different stacks and to learn and research new technologies, team techniques, code and design patterns as the need arise.

Work Experience

December 2019 – Until now

Clube Delivery (former 1App client who I started working directly).

At Clube Delivery I have being working as a solo developer, responsible for the whole system.

Working with REACT NATIVE/JS, CSS, REDUX, Node.js, SQL(Postgress), REDIS, Nginx, GIT and database modeling. Fullstack engineer.

November 2017 – December 2019

1App Company

Working with REACT NATIVE/JS, CSS, REDUX, Node.js, SQL(Postgress), GIT and database modeling as Fullstack developer.

October 2017 - December 2017

Start up Menu Project.

Working with IONIC 3, JAVA, HTML/CSS/JavaScript, SQL(MY SQL), GIT, TOMCAT and database modeling.

By November I joined 1app company.

July 2016 - August 2017

Start up TragoAqui Project.

Working with IONIC 1, JAVA, HTML/CSS/JavaScript, JQUERY, SQL(MY SQL), GIT, TOMCAT and database modeling.

In addition to the development of the system, I worked on the organization of the project and the business in general with 2 other partners.

Also during this period there was some contact with UNITY 3D (C#) and PHP (3~4 months).

August 2010 - December 2015

Internship and full-time job in the company Virtualis. Working with HTML / CSS / JavaScript, JQUERY, SQL (Postgress), JAVA, TOMCAT Ireport, database modeling. Focused on ERP development.

Education

January 2008 - July 2016

Bachelor Degree of Computer Science, Universidade de Santa Cruz do Sul
