Professional Summary

Mobile and Web Full Stack Developer. Looking to work remote in mobile/web projects using REACT NATIVE(mobile) or React JS(web). I can also work in Back-end (JAVA/Node.JS), if needed. Im always open to learn and research new technologies, team techniques, code and design patterns as the need arise.

Work Experience

November 2017 – Until Now
1App Company (until december 2019).
Clube Delivery (former 1App client who I started working directly)
Working with REACT NATIVE/JS, CSS, REDUX, Node.js, SQL(Postgress), MongoDB, GIT and database modeling.
At Clube Delivery I have being working as a solo developer, responsible for the whole system.
Working remote.

October 2017 - December 2017
Start up Menyu Project.
Working with IONIC 3, JAVA, HTML/CSS/JavaScript, SQL(MY SQL), GIT, TOMCAT and database modeling.
By November I joined 1app company.
Working at home.

July 2016 - August 2017
Start up TragoAqui Project.
Working with IONIC 1, JAVA, HTML/CSS/JavaScript, JQUERY, SQL(MY SQL), GIT, TOMCAT and database modeling.
In addition to the development of the system, I worked on the organization of the project and the business in general with 2 other partners.
Also during this period there was some contact with UNITY 3D (C#) and PHP (3~4 months).
Working at home.

August 2010 - December 2015
Internship and full-time job in the company Virtuallis. Working with HTML / CSS / JavaScript, JQUERY, SQL (Postgress), JAVA, TOMCAT Ireport, database modeling. Focused on ERP development.

Education

January 2008 - July 2016
Bachelor Degree of Computer Science, Universidade de Santa Cruz do Sul
